

CHAMCHA WOOD

Chamcha wood is a fast-growing tree that is prized for its richly figured grain and distinct sap line. It is characteristic for these trees to grow crooked and with low and heavy branching. This allows for some of the most interesting and organic forms seen in the world's forests.

- One-of-a-kind pieces...Grain varies.
- Kiln-dried for two weeks.
- Hand-applied natural oil and wax to protect.
- Lacquer clear coat is available.
