There is something mesmerizing about the power of water and how it softens the rough edges of rock. Designer Jason Phillips found inspiration in nature's ability to shape a hard surface into something beautiful. The top surface is flat and functional. Available in two sizes and various finishes that work outdoors.

Our Roman Stone and White Stone finishes are two great options for enhancing your outdoor space! Both have the look and feel of chiseled stone with the reinforcement of resin, and the finish is completely suitable for outdoor use. Roman Stone is beige, whereas White Stone is completely white. The cool feel and heavy weight make it seem like real stone, while still being manageable. Two great options for a neutral palette.

CAST SMOOTH CHAIR, WHITE STONE

I-BEAM WALL SHELF, RUST
PH79018 · 60x10x9”H · Resin

A large, modern aluminum sculpture of a human figure with arms outstretched, standing on a square base. The sculpture is made of aluminum with a textured, wavy surface. It is positioned in a modern outdoor setting with a stone wall, greenery, and a building in the background. The sculpture's arms are extended horizontally, and its legs are slightly apart, giving it a dynamic, reaching pose. The background features a light-colored stone wall, lush green trees, and a modern building with large windows. The overall scene is bright and sunny, suggesting a high-end outdoor space.

SCULPTURE

Our outdoor sculptures take “statement pieces” to the next level. Dramatic, awe-inspiring, and crafted in materials meant to withstand the elements. Our aluminum figures speak for themselves, whereas our best selling collections of cast dogs work outdoors in roman stone and our bronze finish. Our colossal rock sculptures look so real you won’t believe it!
