

ERODED WOOD BLOCK ON STAND, ASSORTED

Erosion is a fascinating process in which wood and stone are broken down over time and relocated by the invisible hand of Mother Nature herself. When wood begins to erode, it can develop into unbelievably captivating shapes that defy imagination. Phillips Collection's Erosion Sculpture on Stand is a recreation of this natural phenomenon that demonstrates the unique forms wood can take when introduced to the elements. Constructed from teak wood in a bleached finish, the Erosion Sculpture is mounted to a matte black iron stand that gives this organic piece a splash of modern flair.

Size	16x9x22"h (18x11x24"h packed)
Weight	13 LBS (18 LBS packed)
Material	Wood, Metal
Finish	
Color	Brown, Black
SKU	ID102135
