

FILAMENT PLANTER

Raw Gray, LG

For those who love to surround themselves with banks of flowers in a riot of colors but who have contemporary tastes, we offer the Large Filament Planter. Made of composite in a raw grey finish, this garden accent will allow the flowers or plants within it to take center stage. The character of the surface with its striations illustrates the talent of our finish artisans and the rolled lip on its topmost edge is a tailored design note. This planter is perfect for terraces, patios, and loggias because a drainage hole has been pre-drilled into its bottom. Place this garden planter just outside a window and you can enjoy the flora that thrives even when inside! We also offer the Filament Planter in small and medium sizes, each of which reflects Phillips Collection's ethos: modern organic.
