

RIVER STONE COFFEE TABLE, GRANITE, LARGE

The finish on our River Stone Large Dark Granite Coffee Table is a marvel of technology, as flakes have been applied to the surface. This not only makes it look like real stone, it results in a very strong weatherproof finish. It simply will not scratch and the surface weathers the outdoors for several years. The organic feel of this coffee table shaped like a rock introduces softness into a contemporary space and naturalness to a traditional one. It's made of composite so it's much easier to move around than real stone. We offer a number of sizes and finishes in this family of products, each of which shows our deep appreciation for melding nature and design.
