

BARNACLE CLUSTER WALL ART

LG

Emulating the watery world that sways below the ocean's surface is a favorite pastime of the designers at Phillips Collection. We are often experimenting with different nautical forms that catch our eye. Case in point is the Large Barnacle Cluster Wall Art, which was inspired by a real cluster of barnacles reclaimed from dried-up sea beds and replicated in composite. This piece of decorative art is easy to mount and reflects the ethos of our modern organic vibe. Though these nautical decorative accents will fit swimmingly in an oceanfront condo or a seaside cottage, they will also bring a hint of oceanic charm to the urban oasis of someone who's a beachcomber at heart. We also offer this wall sculpture in a medium size.
